

Anadromous Fish Advisory Committee  
2007 Work Plan

**(1) Program Amendment Process**

Direction from Members: 1) define and clarify terms (i.e., focal species, objectives, how to express limiting factors, etc.), 2) confirm population level biological objectives, 3) ensure that priorities affecting fish and wildlife are captured in this process, 4) validate current limiting factors including out-of-basin affects, and 5) review and build on strategies and actions necessary to reduce the limiting factors.

- Define and clarify terms by April MAG meeting
- Confirm populations, objectives and limiting factors by May MAG meeting
- Review and build on strategies and actions by August MAG meeting

**(2) StreamNet / Data Management Priorities**

- Key AFAC members and AFAC coordinator stay “in the loop”

**(3) In-Lieu Analyses**

- Analyses and response as needed

**(4) BiOp Remand**

- Analyses and response as needed

**(5) Hatchery Reform Project**

- Analyses and response as needed

**(6) Joint AFAC-RFAC Meeting/Site Visits**

- Potential site-visit and joint meeting in August

**(7) Lamprey Technical Workgroup**

- Review progress towards resolving 2005 “critical uncertainties”
- Develop plan for addressing the BPA comment regarding the need for developing a research plan that will identify the effects of the Hydro System and identify potential mitigation measures. This will also lay the groundwork for development of a lamprey conservation plan, which is one component of the workgroup’s five-year vision.

**(8) Umatilla Subbasin Review Process**

- Stay “in the loop”; review products as appropriate

**(9) Status of the Resources Project**

- Assistance
- Input
- Review
