Subject: Re: Review of summary CBFWA workplan

Lynn,

In reference to the "Summary of 2007-2009 program-related coordination needs from managers" memo, the following items are some needs that CRITFC feels should be added to the list:

- Cost Share Opportunities: Assist in securing potential non-BPA funding for project funding that complements BPA funded projects.
- Monitoring of ongoing regional processes: Monitor regional processes that affect the successful implementation of the Fish and Wildlife Program.
- Coordination of all Tribes in matters that affect the Fish and Wildlife Program.

If you have any questions you can give me or Jaime at (503) 731-1252 a call. Laura

Greetings All,

In response to the discussion by Council members at the August meeting on coordination proposals, I am forwarding two documents that may help us organize our thoughts to work through the issues:

1. The first is a high-level draft summary of coordination needs to be provided by F&W managers that the

Council anticipates for 07-09. The summary is based on the work proposed in CBFWA's 07-09 proposal, and work activities that the Council is engaged in or is anticipating (from the rolling issue memo).

2. The second attachment is the staff recommendation to the Council on coordination issues from the August meeting.

We would like your initial feedback on the summary of coordination needs. As recommended in the staff paper, the first step in work through this issues would be to identify regional support tasks necessary and appropriate for Bonneville funding for agency and tribal participation. The are outlined in the summary of coordination needs and hopefully we have covered the big chunks. If this is helpful for you to organize and define your proposed work, then the next steps would be to flesh this out by further defining tasks and organizations for each of the elements.

Just to be clear on what we are asking now: feedback on the elements; if this outline captures most of the regional coordination needs for the program; and will this be helpful for you to further define your work as we move forward with the Council recommendations in the next few months.

Thanks much, and please call if you have any questions.

Lynn
