Subject: NPCC Monitoring Project List and Monitoring Planning Process Overview

I have attached from the NPCC's web site the list of projects currently identified for the RM&E and Artificial Production Categorical Reviews and an overview of the planning process. The current anadromous fish monitoring less 10% for the anadromous monitoring workshop will come from this list. As you can see sections 2a, 3, and 5-11 all contain anadromous monitoring projects so I'm sure there will need to be some confirmation on this. I will keep you posted as the picture becomes clearer.
