**Integrated Regional Management Plan Proposed Process and Schedule** 

DIDITO

DIARE

## **SUMMARY**

There is currently a disconnect between the NPCC's project selection process, recovery planning, and the Program amendment process

There is a role for CBFWA to develop an integrated Regional Management Plan as a Program amendment and an opportunity to use the RMP to guide the project selection process

## August 2-3, 2005 Members Meeting

Melinda Eden indicated that the NPCC is seeking CBFWA's assistance in:

- Defining project selection process
- Facilitate regional review of projects
- Assist with AHA modeling
- Assist with regional allocations of money
- Defining final provincial objectives
- Identifying CBFWA's role in project selection

### August 2-3, 2005 Members Meeting

Rob Walton indicated that the NOAA/NMFS is seeking CBFWA's assistance in:

- Implement ecosystem approach bull trout, lamprey, and sturgeon with salmon rec.
- Integrate prioritized objectives and recovery goals
- Assist NOAA in recovery plans and integrating blocked area needs
- Communicating relationship between ESA goals and federal trust/treaty responsibilities

## August 2-3, 2005 Members Meeting

Bill Maslen indicated that the BPA is seeking CBFWA's assistance to:

- Consolidate report of resource status and Program achievements
- Facilitate Cost share workshop and information
- Evaluation of risks associated with actions and rates of implementation
- Support for funding contributions from others
- Develop prioritization and limiting factors strategies
- Help develop decision process to address limiting factors

August 2-3, 2005
<b>Members Action</b>

Date	Current anticipated NPCC Schedule	CBFWA Recommended Schedule CBFWA presents integrated Regional Management Plan approach						
Sep-05	Adopt 07-09 project selection process							
Oct-05	NPCC Solicit Program Amendment	CBFWA facilitates province level integration which includes:						
Nov-05	Solicit 07-09 Project proposals	resident fish population status and management report, 4 H planning approach for anadromous fish (integrated with TRT products and SBPs), and						
Dec-05		wildlife update DRAFT Recovery Plans Due						
Jan-06	07-09 Project proposal submittal	NPCC Solicit Program Amendment and						
Feb-06	Project review (5 mo)	CBFWA works on regional integration of province level work						
Mar-06	Program amendment comments/recommendations	Coordinated Basinwide Ecosystem Plan (Unified Plan) which integrates: SBP goals, Province level goals and objectives for each focal species, ESA recovery goals, Set of actions by strategy to meet objectives and schedule (basis for project solicitation and selection and cross cut budget approach)						
Apr-06		BPA project proposal solicitation						
May-06		Project review (6 mo) facilitated by CBFWA						
Jun-06		Including site visits, project presentations, management and scientific review, and CBFWA recommendations						
Jul-06	NPCC 07-09 project selection - province							
Aug-06								
Sep-06	Adopt Program Amendment with province biological objectives							
Oct-06								
Nov-06		NPCC Adopt Program Amendment NPCC select 07-09 projects						
Dec-06	NpCC 07-09 project selection - mainstem	Completed integrated Council Program with recovery plans, project selection for 07-09 with cross cut budget opportunities						

# August 24, 2005

**Decision Framework Workgroup** 

### Steps:

- Update process objectives
- Identify critical elements of processes
- Update draft schedules
- Identify opportunities for integration

## **Process Objective**

To create a decision pathway and schedule:

- That allows the NPCC the opportunity to select projects... based on an Integrated Regional Management Plan
- Which integrates Subbasin Plans, ESA recovery plans, and other existing Federal, State and Tribal plans into a single unified plan for the basin
- To support a project selection process that puts projects on the ground for Fiscal Year 2007 with adequate ISRP review and local prioritization
- And results in a regional research plan, a Program-wide monitoring and evaluation framework, and a Program-wide coordination plan

## SOLUTION: Regional Management Plan

- CBFWA New Directions Work Plan Objective 3
- Integrates recovery planning, subbasin planning, and Federal, State, and Tribal fish and wildlife plans
- Provides a reporting mechanism for measuring success of the Program

### **Regional Management Plan Process**

#### **Step 1: Province Planning Workshops**

• Using the recent NPCC AHA effort and CBFWA resident fish status review as a base, province level workgroups would develop biological objectives and/or action plans

#### **Step 2: Integrate Province Plans to create RMP**

• CBFWA would facilitate the integration of the province level action plans, combined with the M&E Framework and Research and Coordination plans to form the RMP

### **Regional Management Plan**

- CBFWA would facilitate Province level meetings of the technical staffs that developed the subbasin assessment information for subbasin planning and recovery planning
- The technical groups would identify existing population objectives and evaluate strategies consistent with subbasin and recovery plans
- The technical groups could also develop potential habitat and hatchery actions necessary to meet the population level objectives

### **RMP Deliverables**

- Fish and wildlife population level objectives integrated with ESA Recovery Plan and broader management objectives (e.g., Tribal and State plans)
- Strategies that address the primary limiting factors to achieving the biological outcomes
- An implementation schedule, and likely funding partners, for achieving the biological outcomes

## **RMP Deliverables for Basin-wide Programs**

- A regional Monitoring and Evaluation Framework to guide project selection and support an annual status of the resource report
- A basin-wide Research Plan
- A basin-wide Information Management and Coordination Plan
