

Bonneville Power Administration FY2003 Upper Snake Province Funding Recommendations For New Proposals and

| Proposal Number | Sub-basin | Proposal Title | ISRP Rank | BPA Rank | RPA | BPA Comment |
|-----------------|-------------|---|-----------|----------|-----|--|
| 33001 | Snake Upper | Assessment of genetic population structure and risk of introgression and hybridization to native trout in the Mid and Snake Upper River Provinces | Fundable | C | No | Do not recommend. The discussions and agreements among responsible entities, as called for in the Council's 1995 F&W Program have not yet taken place. Findings on Section 10.5B. As BPA commented in 1995, FWL Program amendments, it may not be an FCRPS responsibility to mitigate above Hells Canyon dam if not affected by the construction or operation of Black Canyon, Anderson Ranch, Boise Diversion, Minidoka, or Palisades reservoirs. |
| 33009 | Headwaters | Improve Yellowstone cutthroat trout recruitment and survival in the South Fork of the Snake River | Fundable | C | No | Do Not Recommend. Consistent with the Council's 1995 FWL program, BPA recommends development of "assessments of resident fish losses and gains related to construction and operation of each hydropower facility throughout the Columbia River Basin ...". Section 10.1C.1. BPA stands ready to fund completion of appropriate assessments as part of subbasin planning. Section 10.1C.3. |
| 33011 | Snake Upper | Implementing land use for resource and community sustainability at the county and regional level. | Fundable | D | No | Do not recommend. This appears to be a responsibility of local government in meeting its planning and development needs. The connection to mitigation for the FCRPS is unclear. |
| 1992-010-00 | Snake Upper | Habitat Restoration/Enhancement Fort Hall Reservation | Fundable | A/ Cond | No | Fund O&M, M&E and Planning only; new implementation work should await Subbasin Plan. Develop the Range Management Plan identified in the ISRP response. This should resolve grazing issues if possible. Also complete the watershed management plans identified in the ISRP response. |
| 1995-057-00 | Headwaters | Southern Idaho Wildlife Mitigation - Upper Snake | Fundable | A/ Cond | No | While these SIWMP projects are addressing FWP priority species, the funding of the projects needs to be coordinated with other SIWMP proposals. Implementation Phase funding for new habitat acquisitions should be maintained at the FY01 levels (plus inflation factor) pending adoption of Subbasin Plans. In addition, on-going O&M and M&E should be funded to maintain past investments |
